WHAT AWAITS YOU INSIDE.....

Dear, *Parents*

EVERY MONTH IS A STORY OF GROWTH.

Every page of this *growing up stories*

reflects the *joy*, curiosity, and

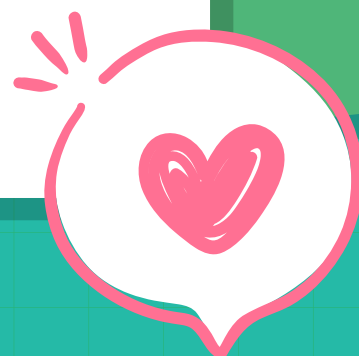

growth of your child experienced

during the first month at Balvatika.

Through thoughtfully planned experiences, we nurtured every aspect of development—from building friendships and confidence to encouraging creativity, communication, observation, exploration, and school readiness.

Sincerely,

TEAM Balvatika

Join us as we explore the child's first month through these seven pillars of learning:

Little Steps
Big Milestones

Connected

Moved

Communicated

Observed

Created

Explored

Discovered

"Every step may seem small, but together they create a strong foundation for lifelong learning."

Connected

Every great learning journey begins with a sense of belonging. During their first month at Balvatika, children became familiar with their surroundings, connected with teachers and classmates, and settled into daily routines. Through circle time, collaborative play, group discussions, and shared experiences, they formed meaningful friendships, developed independence, and discovered that school is not just a place to learn, but a joyful second home where they feel safe, valued, and inspired every day.

Connected

BELONGING

Growing
Together

Connected

With growing confidence and a sense of belonging, children enthusiastically embraced a variety of movement-based experiences that encouraged active participation and joyful learning. Through fun-filled physical challenges, balancing activities, team games, and coordinated movements, they developed strength, agility, coordination, and body awareness. Every activity inspired children to move with confidence, work together, and build healthy habits while discovering the joy of learning through play.

COMMUNICATED

Children began their journey of becoming confident communicators by learning and using new vocabulary to express their thoughts, ideas, feelings, and experiences. Through storytelling, conversations, and interactive language experiences, they were encouraged to share, listen, and respond to others. These meaningful opportunities gradually nurtured their communication, comprehension, and self-expression, helping them build confidence one conversation at a time.

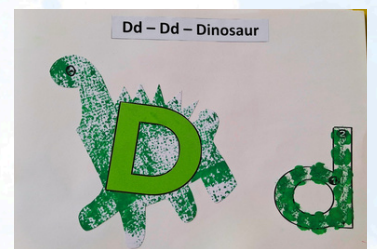

CREATED

Creativity flourished as children explored a variety of art experiences using different materials, colours, and techniques. Through drawing, painting, colouring, and craft activities, they expressed their ideas, thoughts, and imagination in unique ways. These hands-on experiences nurtured creativity, strengthened fine motor skills, and encouraged self-expression while fostering confidence and a sense of accomplishment.

Colours, Creativity, and Confidence.

OBSERVED

Focus of the Month: Observation Skills

This month, children were encouraged to become keen observers, exploring the world around them through meaningful experiences and hands-on activities.

Teachers thoughtfully planned activities that encouraged children to look closely, notice details, compare, identify similarities and differences, and make connections. Through guided exploration and inquiry-based learning, children sharpened their observation skills while developing curiosity, concentration, and critical thinking.

EXPLORED

Children embarked on an exciting journey to explore the fascinating world of animals and their habitats. Beginning with penguins and their icy surroundings, they gradually discovered a variety of animals living in oceans, forests, farms, and gardens. Teachers created engaging, age-appropriate learning environments using models, visual displays, interactive discussions, and sensory experiences that encouraged children to observe, compare, classify, and build meaningful connections. These explorations nurtured curiosity, enriched vocabulary, and fostered a deeper understanding and appreciation of the natural world.

EXPLORED

EXPLORED

Reinforced

To deepen children's understanding of the **Animal World** project, engaging reinforcement activities were planned beyond the classroom. The **Puppet Show** brought animal characters to life, helping children observe, identify, and appreciate different animals through interactive storytelling.

The excitement continued with **Jungle Jive Day**, where children dressed up as different animals and enjoyed themed activities, music, movement, and imaginative experiences, creatively expressing their learning while building confidence and connecting with the animal kingdom. These joyful experiences reinforced concepts, enriched vocabulary, encouraged observation, and made learning memorable.

DISCOVERED

Children took their first steps towards academic readiness through meaningful, hands-on learning experiences. By discovering early number concepts, patterns, sequencing, and language-rich activities, they began developing foundational literacy and numeracy skills.

Partnering with Parents

A parenting session was conducted for Pre-Nursery and Nursery parents to familiarise them with Balvatika's child-centred pedagogy and the learning experiences. Parents were introduced to how children learn through **Expression, Exploration, Discovery, Creativity, Free play, and Experiential learning**. The session also highlighted our approach to planning activities that cater to **Visual, Auditory, and Kinesthetic learning styles**, while explaining the readiness programme designed to ensure a smooth transition and build a strong foundation for future learning.

The session highlighted Balvatika's **conducive learning environment**, where children learn through exploration, play, creativity, and meaningful experiences.

Tiny hands, big dreams,
Happy hearts and joyful beams.
Every smile, every play,
Helped us learn in a special way.

THANK
YOU
